(54) Title: VIRTUAL DESKTOP - META-ORGANIZATION & CONTROL SYSTEM

(57) Abstract: Virtual Desktop - Meta-Organization & Control System wherein a real-time-accessible memory media having at least one dynamic substantially cyclic electronic-data structure is associated (by an ongoing algorithmic activity for respectively regularly transforming each process of a plurality of processes running in the environment) into an associated graphic representation, and logically assigns the representation to a location in the data structure - such that for the data structure, a graphic user interface facilitates viewing of the representations assigned to at least one of the data structures and facilitates organizing of the at least one data structure.
